 Sprint 1 ▾

Meeting 1- Zoom

Created by Mohamed Mar 10 | Updated: Mar 10

I then did the same for sprint 2 and added all the tasks that we needed to complete. This is similar to the process in sprint 1, i added all the tasks that members of the group needed to complete to the kanban table and then added all meeting sand reviews in the epics project views.

This is the kanban table for sprint 2, which has all the previous tasks from sprint 1 along with new tasks; case diagrams, full-use cases defined, issues being used on github and others pdf documents that needed to be completed for sprint 3.

This is the epics project view for sprint 2, which is also similar to sprint 1 in the fact that it includes all the tasks that needed to be completed and all the meetings that the group has had.
